APRIL

# PREFACE

Commodities reported in this summary, with abbreviations used in the tables, are shown on the next page. The actual State of origin was obtained, when possible, on reshipments and shipments out of storage. Most Illinois mixed vegetables unloaded at cities in the Middle West were reshipments from Chicago. They were reloaded from inbound carlots originating in various States. Mixed cars containing as much as 90 percent of one commodity were classified under the name of that commodity. When no single commodity comprised as much as 90 percent, cars were classified in the proper mixed category; mixed citrus fruit, mixed vegetables, etc. Some divergence from this 90 percent rule may be expected in view of large number of transportation employees involved in preparation of the reports.

The sum of unloads exceeds imports of certain fruits reported in shipment summaries. This is because all boat receipts at New York City are shown as unloads. Some are subsequently shipped to interior cities.

Truck unloads, expressed in carlot equivalents, are reported for 32 U. S. cities and 5 Canadian cities. It is impossible to obtain complete reports of truck unloads, because trucks ordinarily handling fresh fruits and vegetables are not required by law to maintain complete records of tonnage handled. Estimated percentage of completeness is shown for truck on each city report. These estimates take into consideration movement in wholesale commercial channels, including chain stores and farmers' markets. "Unknown" under State of origin largely represents quantities repacked enroute and correct State of origin was not available.

Special distribution tables for products reported in this summary are included for rail and boat movement, as well as motor truck insofar as latter is available. See index on next page.

The unloads reported for the 5 Canadian cities were furnished through the courtesy of the Canadian Department of Agriculture. Cooperation on the part of railroad, express and steamship agents, as well as members of the produce industry, officials and State departments of agriculture and farmers' markets, is hereby gratefully acknowledged.
